

OPEN YOUR DOOR TO COMFORT AND SAVINGS

Energy Efficiency Program

Participating Contractor

Save now with these rebate programs & save monthly with a more efficient home.

Heat Pump Tune-Up

Schedule routine maintenance on your existing heat pump equipment to improve the efficiency of your home, and qualify for a rebate of up to \$90. A heat pump tune-up can also:

- Prolong the life of existing equipment
- Ensure the unit is clean and has good airflow
- Give you better temperature and humidity control

domsavings.com/heatpump

Heat Pump Upgrade

Save money all year long by replacing your existing heat pump with a new and more efficient model. Use less energy to heat and cool your home and earn a rebate of up to \$250 to help offset the cost. Additional benefits include:

- Added value to your home
- Better control of interior temperature and humidity
- Peace of mind that comes with year-round comfort

Home Energy Check-Up

Get a detailed report of your home's energy use and cost-effective ways to reduce it. Then enjoy a rebate of up to \$250 based on the number of energy-saving measures you have installed, which may include:

- Compact fluorescent light bulbs (CFLs)
- Water heater pipe insulation
- Door weather-stripping

Duct Sealing

Save energy and earn a \$125 rebate while making your home more comfortable with improved airflow from duct sealing. The benefits of properly sealed air ducts add up:

- Close gaps where conditioned air may be leaking
- Eliminate hot and cold spots
- Reduce risk of pollutants circulating in your home

Simple Tips

to help you conserve energy!

1. Plug home electronics into power strips with surge protection. Turn the strip off when the equipment is not in use.

2. Replace regular light bulbs with ENERGY STAR® Compact Fluorescent Lights (CFLs). CFLs use up to 75% less energy.

3. Plant deciduous trees on the south and west sides of your home to block the afternoon and evening sun.

4. Only wash full loads of dishes in the dishwasher and use the energy-saving setting for the drying cycle (or let dishes air dry).

5. To save on water heating costs, use cold water to wash clothes when doing laundry.
